Our Dangerous Goods Store is designed to house all your pre packaged dangerous goods safely on site. With ample shelving, lock up cages and a bund for spills, this unit is your compliant DG solution.

Details

SCF's Dangerous Goods Store is designed to house all your hazardous chemicals on site in a certified, external store room. It comes standard with 3 shelves for the storage of pre packaged chemicals, corrosives and flammables.

Each unit also comes with a secure lockup, so you can secure specific items.

Keep your hazardous goods secure with the external lock whilst keeping workers out of harm's way with the use of the interchangeable placard signage plate located on the external doors.

As with all SCF Dangerous Goods products, the Dangerous Goods Store comes with an internal escape mechanism, so your team can exit the unit if locked in by accident.

Key Features

- Compliant to AS3780
- 1,300L Bund Capacity
- Internal emergency exit
- 3 levels of inbuilt shelving, each rated to 1 ton
- Lock up cage for secure storage
- Mini steps included for safe entry and exit - compliant to AS1657
- Tyne pocket in both directions to allow for easy on site positioning
- Can also be moved with a pallet jack
- Lugs for crane lifting
- Secure mounting system so unit can be bolted into place
